Specially recommended for Quick & Effective Relief from All type of Neurological disorders

A neurological disorder is any disorder of the nervous system. Structural, biochemical or electrical abnormalities in the brain, spinal cord or other nerves can result in a range of symptoms. Examples of symptoms include paralysis, muscle weakness, poor coordination, loss of sensation, seizures, confusion, pain and altered levels of consciousness. There are many recognized neurological disorders, some relatively common, but many rare. They may be assessed by neurological examination, and studied and treated within the specialities of neurology and clinical neuropsychology.

Neurological disorders are diseases of the brain, spine and the nerves that connect them. There are more than 600 diseases of the nervous system, such as brain tumors, epilepsy, Parkinson's disease and stroke as well as less familiar ones such as frontotemporal dementia.

Conditions

- ALS
- Arteriovenous
- Malformation

Thyroxine is a hormone which is produced naturally in the body by the thyroid gland. Levothyroxine is a synthetic version of this hormone. Thyroxine controls how much energy your body uses. When the thyroid gland does not produce enough thyroxine (a condition known as hypothyroidism), many of the body's functions slow down.

- THYROSUN tablets are used to replace naturally the thyroxine that your thyroid gland cannot produce and prevent the symptoms of hypothyroidism.

INDICATION

- To maintainance of thyroid gland for supportive treatment of hyper & hypothyroidism
- Goiter

Dosage :

1 to 2 Tablets 2 times a day after meals with milk or as directed by physician

Available at all chemists in
PACKS of 60, 5x30 & 1000 Tabs.
